What can **E-Citation** do for your agency or officers in the field?

Officers put their lives at risk every time they step out of their car including addressing a traffic violation. The manual nature of investigating and citing a violator represents a large part of the problem. Officers need a less arduous means of determining the validity of the suspects' name, address, driver's license and possibly a criminal background.

Thinkstream has developed a solution that assists the officer in completing a citation quickly and accurately. The officer begins the creation of a traffic citation starting with DL or SSN entry. If a mag-stripe device is available, DL capture is completely automatic.

Once the citation has been completed, on the laptop or handheld device, it can be printed on the spot. Where network connectivity is available, the ticket can also be submitted to the Police Department's RMS or Courts CMS. If connectivity is not available at the time, previously entered citations can be submitted at a later time in a batch to the RMS or CMS when connectivity is available offering complete flexibility.

Introductory Offer
$1000 for Thinkstream Customers ($500 for Mobile Customers)

Offer expires June 1, 2008
